

DEGREE PROGRAM

Business Management

Supply Chain Management Concentration

The AAS Business Management – Supply Chain Management (SCM) concentration provides the same broad-based study of organizational strategic plans, resources, roles, responsibilities, and functions, while also focusing on management of Supply Chain activities. This study involves consideration and application of processes to develop coordinated supplier-to-consumer systems, including: identifying needs for raw materials, supplies, and components; developing specifications; computing quantity requirements; selecting sources and negotiating agreements; acquiring, transporting, and storing inventory; managing and maintaining operations; and logistics management.
