

## **Math Readiness**

The course focuses on basic arithmetic, including the use of whole numbers, fractions, and decimals. Students will develop problem-solving skills, computation skills, and practical applications in all areas of decimals, fractions, and whole numbers. Students will develop a working understanding of mathematical vocabulary and identify the steps and order of operations needed in solving word problems.

*Students enrolling in these courses may participate in Powerpath, a process identifying vision, auditory and learning stress conditions that inhibit acquisition of skills. The process also empowers students to develop appropriate learning strategies.*
