Airline Flight Attendant Certificate

Sinclair
Community
College

Aviation Technology

The Airline Flight Attendant Certificate

provides students with the basic knowledge of airline travel with an understanding of the policies, procedures, and means of compliance with the Federal Aviation Regulations. Students will explore the business of air commerce, and develop the skills of a professional flight attendant. Students will explore the areas of aviation meteorology, communications, safety and security, air travel, customer service, first aid and first responder, and crew resource management. This training is specialized to enable the student to develop the skills required to serve as a flight attendant and enter a career in the aviation industry.
