

# **New Course: Spring 2008**

## **“Scientific Thought and Method”**

**SME 110-01 :Tuesday-Thursday 9-11:30**

**Instructor:** Doug Bradley-Hutchison

Are you thinking about majoring in one of the sciences (biology, chemistry, geology, physics or related fields like pharmacy) and would like to improve your science and math skills prior to enrolling in courses within your major area of study? If so, SME 110 is designed for you. Learn, through hands on lab work, how science works and how scientists think. So get into the lab, get your hands dirty, and learn what science is really about!

*SME 110 is part of a partnership between Wright State and Sinclair to increase enrollment in the sciences. SME 110 is equivalent to SM 101 at Wright State which counts towards the Area VI General Science requirement in the College of Science and Mathematics.*
