Program Specific Information Packet
Starting with Fall 2019 Cohort

Respiratory Care (RET)

Building 14, Room 319
(937) 512-2268
(800) 315-3000

Dear Prospective Respiratory Care Student:

If you are interested in the RET program, please first download the HS Applicant Information Packet for Degree Programs located on the HS website at: http://www.sinclair.edu/academics/divisions/hs/

This packet contains the following information for your review:

1. Eligibility for Entry Into Limited Enrollment Courses
2. Essential Functions/Skills Required
3. Respiratory Care Curriculum
4. Description of the Respiratory Care Profession
5. Accreditation Status
6. Program Goal and Outcomes
7. Programmatic Outcomes Data
8. Cost of Program
9. Criminal Background Checks, Licensure and Employability in the State of Ohio
   a. Offenses Prohibited for Healthcare Professions
10. National Board Examinations and Credentials

Revised: August 2020
ELIGIBILITY FOR ENTRY INTO RESPIRATORY CARE PROGRAM
LIMITED ENROLLMENT COURSES

Getting Started: Download and print the Health Sciences Applicant Information Packet at http://www.sinclair.edu/academics/divisions/hs/. This packet includes a step-by-step checklist for entry into limited enrollment courses in the Health Science programs. Students qualify for entry into limited enrollment respiratory care courses on a “space available” basis. “Space available” is based on the date you declared RET as your choice of study. Consideration for entry in the program include:

1. Must be 18 years of age or older.
2. Complete all pre-requisite courses with a grade of “C” or better and have a 2.5 cumulative GPA at Sinclair Community College. Pre-requisite courses include:
   - Human Biology: BIO 1107
   - Introduction to Chemistry: CHE 1111
   - Medical Terminology: HIM 1101
   - Mathematics: MAT 1130 or any approved OTM MAT
   - Introduction to Respiratory Care: RET 1100
3. Preadmission Exam: Students will take the Test of Essential Academic Skills (TEAS). Students will be advised in their initial advising appointment that the TEAS assessment test will be required. The minimum Overall/Average score has been eliminated and instead new minimum cut scores are now set for the other four sections of the TEAS as follows: Reading – 60%, Math – 60%, Science – 50% and English – 60%. Students must receive the new minimum cut scores in these sections of the TEAS in order to be eligible for the Respiratory Care program’s limited enrollment courses.*

*Effective December 1, 2019, the TEAS is limited to three (3) times per calendar year.

Students will be reviewed for entry after May 15th each year for Fall admissions. Students may defer (one time only) the start date of the program. Any exceptions to eligibility requirements must be approved by the Department Chair.
Accelerated Admission for Academic Achievement (AAAA)
Respiratory Care Program

The Division of Health Sciences established an admission model for some of its programs named the Accelerated Admission for Academic Achievement (AAAA). This model was established to reward students for excellence in academic achievement. Participating programs will be permitted to accept a percentage of students into each cohort eligible to start limited-enrollment courses based on department established criteria. The Respiratory Care program incorporated the AAAA model as an optional process for entry to the technical courses with limited enrollment. This model for admission is in addition to the open enrollment admission Sinclair Community College has for its programs and will not prevent students who meet the established program prerequisites from qualifying for entry to limited-enrollment courses on a space-available basis.

In order for students to be eligible for the AAAA track (Quad A), they must:

- Have an “A” or “B” in BIO 1107, CHE 1111 and MAT 1130 courses on a first attempt (including withdraws)
- Achieve the new minimum cut score of 60% in the following four sections of the TEAS: Reading, Math, Science and English (You can only take the TEAS test twice (2 times) to be considered for the Quad A program)

Once the criterion has been established, students may receive additional points toward their total placement score for the following:

1. Student has an Associate of Applied Science degree in a HEALTH program.
2. Student has a Bachelor’s degree or graduate level degree

An established rubric scoring system is in place to allow students who meet these criteria to be ranked and placed on the AAAA Eligibility List according to their scores. The Program can admit up to 50% of each fall’s cohort year based on academic achievement. Once the 50% has been reached, those who did not rank for the cohort year may be admitted based on eligibility date. Any students not admitted will remain on the eligibility list for the following year.

*Mandatory orientation will occur prior to students registering for fall term technical courses with limited enrollment. Students must also pass a criminal background check by the due date provided during the orientation and prior to the beginning of technical courses with limited enrollment. Failure to do so will result in the forfeiture of the student’s entry to the program’s limited enrollment courses.

See Respiratory Care Admission Rubric on the next page.
NAME: 

TARTAN ID: 

RET.S.AAS DATE: 

Section I: GPA (Sinclair cumulative GPA must be minimum of 2.5 for review)

Note: Students must have sent all official transcripts from ALL previous colleges/universities to SCC, Registration & Student Records, 444 W. Third St., Dayton, OH 45402-1460.

AAAA (Accelerated Admission for Academic Achievement): YES _____ NO _____

To Be Eligible for AAAA (Quad A) track:
• Student must have an A or B grade on 1st attempt in all BIO, CHE and MAT courses
• Allowed only two (2) attempts to take TEAS exam to achieve 60% in Reading, Math, Science and English sections.

TEAS Test (Due by end of Spring semester)

Date: _______________ Scores: Average: _____ R: _____ M: _____ S: _____ E: _____

GPA as of closing date following Spring semester X10 = [Section I Points:]

Section II: Prerequisites must be completed to qualify for Transcript Review

NOTE: If a student fails or withdraws (or a combination of these occur) three times from the same prerequisite course for entry to limited enrollment courses, they will no longer be considered eligible to have their transcript reviewed.

Passing on 1st attempt: Passing on 2nd attempt: Passing on 3rd attempt:
A= 20 points C = 10 points A= 15 points C = 5 points A, B or C = 3 points
B= 15 points D/F = 0 points B= 10 points D/F = 0 points

"W, D or F" counts as an attempt on any of the below courses.

SCIENCE NOTES

5 year rule does apply for CHE 1111 or BIO 1107 if taken prior to being accepted into the program. CHE and BIO have to have been completed within the past five years. **Can be waived if the student achieves a score of 60% or above in the science category of TEAS.

Section III: Prior Academic Degree (from colleges recognized by Sinclair) – Points for the highest degree only

Applicant MUST notify the department by email (audrey.muslar@sinclair.edu) that he/she has a prior degree.

AAS or Bachelor degree: = 10 points Graduate: = 15 points

Section III

TOTAL POINTS:
In order to assure safe and successful advancement through the RET program, the physical, sensory, communication, cognitive/behavioral and social/behavioral functions listed below are the minimum requirements for all students and graduates. The Essential Functions are listed with a projected frequency that a graduate of the RET program would expect to encounter while practicing as a Respiratory Care Practitioner. However, the frequency may vary depending on the work setting.

Each RET student is assessed throughout the curriculum to determine his/her ability to effectively and safely perform these functions in both the educational and clinical settings. Each RET student must demonstrate competency in all of the Essential Functions in order to complete the RET Program. Skills proficiencies (check-offs) are outlined in each required RET course and must be passed to remain in the program.

If an RET student (or prospective student) has a disability or physical or mental condition (either temporary or chronic) which may impact his/her ability to perform the Essential Functions, this must be indicated on the Student Health Certificate filled out by the student’s health care provider. The student must register with Sinclair’s Accessibility Services Office as soon as possible and provide all required documentation and information as directed. An employee in Accessibility Services will contact the RET Program Director to make a preliminary determination of whether the RET student is able to perform the essential functions and requirements of the RET program, including specifically the listed Essential Functions, with or without reasonable accommodations, or whether any reasonable modifications may be made to the essential functions and requirements. These matters will be discussed with and input sought from the student before any final decision is made. The final decision of whether a proposed accommodation or modification can be implemented resides with Sinclair Community College.

**Student: Physician must complete and sign the Student Health Certificate after reviewing the RET Program Essential Functions. Physician’s form will be given out at the mandatory orientation session prior to beginning the program.**

Refer to the Office of Accessibility Services for further information and clarification (room 10-424).

<tr>
<th>Physical Skill</th>
<th>Context in which Physical Skill is Used</th>
<th>Performance Frequency:</th>
</tr>
</thead>
</table>
| LIFTING:      | • Positioning of people in bed or chairs, weighing up to 300# for the delivery of therapy  
                • Independently & safely demonstrate the strength to lift/carry/maneuver heavy equipment weighing up to 50# | F |
| KNEELING/    | • Assist people who may trip, fall, faint  
                • Perform cardiopulmonary resuscitation (CPR)  
                • Work with people on the floor if required for resuscitation  
                • Assist patients requiring prone positioning | F |
| CROUCHING:    |                                                       |                        |
| REACHING:     | • Must be able to extend arms or hands in any direction and be able to reach oxygen, air or vacuum outlets, emergency alarms, electrical and light fixtures above a patient’s bed, without the aid of a stool (approximately 5 feet from the floor while leaning over equipment)  
                • Retrieve items from multiple locations at various heights | F |
| HANDLING:     | • Sustain grasp  
                • Manipulate body parts and equipment | C |
| DEXTERITY:    | • Fine motor functions to perform skills such as drawing medications or blood, and activating metered dose inhalers  
                • Fine motor functions to manually ventilate a patient with one hand  
                • Fine motor functions to repair equipment with small parts  
                • Fine motor functions to feel, finger and handle equipment  
                • Fine motor functions to seize, grasp, turn, pinch and work as a unit of the hand  
                • Fine motor functions to document | C |
| STANDING:     | • Stand for extended periods of time up to 8-12 hours/day | C |
| WALKING:      | • Safely & timely walk within facility for up to 8-12 hours/day  
                • Safely & timely walk over various surfaces (even, uneven, variety of terrains) inside/outside  
                • Safely & timely walk at a slow and fast pace  
                • Safely negotiate stairs when required | C |
| ENDURANCE     | • Tolerate full-time work (32-40 hours/week) | C |
| BODY MECHANICS: | • Utilize proper body mechanics performing all physical functions  
                • Ability to perform complex motor functions necessary to provide therapeutic intervention and emergency treatment to patients including CPR | C |
| TACTILE:      | • Feel to palpate pulses  
                • Exert adequate pressure  
                • Feel varying skin textures and temperatures  
                • Differentiate between hot/cold | C |

**Sensory Functions**

---

**Performance Frequency:** O = occasionally 50-74%; F = frequently 75-89%; C = constantly 90-100%
| AUDITORY: | • Hearing must be corrected to be able to hear a patient at a distance of 6-10 feet and equipment alarms at a distance of 15-20 feet  
• Hear and listen to a patient's chest for respiratory and cardiac sounds with the aid of a stethoscope and be able to detect quality and intensity of sounds  
• Hear verbal instructions  
• Hear distress sounds & calls for assistance up to 6-10 feet away  
• Hear environment safety alarms  
• Hear for communication from other team members | C |
| VISUAL: | • Have sight corrected (with visual clarity up to 20 feet) so to see in detail client's movements, facial expressions and performance  
• See in detail to detect changes in skin integrity, sweating, skin color, swelling, muscle atrophy  
• See to detect non-verbal communication  
• See to detect environmental hazards  
• Read documents  
• Read equipment dials  
• Read manuals/forms  
• Read research material | C |
| **Communication Functions** | **Performance Frequency** |
| SPEAKING: | • Speak clearly & concisely using proper English in person & via telephone with other team members  
• Must be able to give clear verbal commands (and exchange information) to a patient receiving therapy at a distance of 6-10 feet  
• Establish rapport with other team members  
• Motivate and engage others in treatment | C |
| RESPONDING: | • Respond to & communicate with others with communication disorders (i.e. aphasia, hearing loss, tracheostomies and airways)  
• Respond to & communicate with others from a different background/culture  
• Accurately report findings/results/plans to other team members 1:1 and in team meetings using proper English | C |
| COMPREHENDING: | • English oral language  
• English written language | C |
| WRITING: | • Clear, legible handwriting  
• Computerized documentation  
• Write in proper English using appropriate grammar, vocabulary and word usage | C |
### Cognitive/Behavioral and Social/Behavioral Functions

<table>
<thead>
<tr>
<th>Performance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frequency</td>
</tr>
</tbody>
</table>

- Use critical thinking, problem-solving, and sound clinical reasoning in the delivery of respiratory care including, but not limited to the following:
  - Planning and implementing appropriate patient protocols
  - Making appropriate modifications to therapeutic interventions based on the patient’s physiological and psychological responses.
  - Identifying the need for consultation and determining the appropriate resource (i.e. respiratory therapist or other health care providers/team members).
  - Perform mathematical calculations for medication preparation and administration

- Effectively cope with stress in order to function safely and calmly under demanding educational and changing clinical environments.

- Be aware of surroundings and alert to potential emergencies; respond appropriately to patient situations including pain, changes in physical and/or mental status, and risk for falls.

- Manage time effectively; prioritize multiple tasks; maintain composure in situations that require multitasking.

- Maintain concentration and focus to attend to demanding and continuous tasks throughout the entire class/lab and/or clinical hours

- Demonstrate interpersonal functions required to build rapport and effectively interact with patients, families, caregivers, supervisors, coworkers, and members of the community; exhibit cultural awareness and sensitivity to members of the same or different cultures; treat others with respect, compassion, politeness, and discretion; exhibit social functions necessary for effective collaboration and teamwork.

- Demonstrate attitudes/actions consistent with the core values and ethical standards of the respiratory therapy profession.

- Demonstrate accountability, responsibility, and maturity in the classroom and the clinical environment when giving/receiving constructive feedback.

- Demonstrate accountability, responsibility, and maturity in the classroom and the clinical environment when engaging in conflict management and problem resolution.

- Abide by established policies and procedures of educational and clinical environments

#### Note on Medication Usage

- Must not be physically dependent on non-prescribed drugs. Student must be able to pass drug screens at clinical sites.

Total Credit Hours: 65 semester hours

Effective January 2019
Please note that the number of hours per week for each lecture, lab and/or clinical component is displayed on the previous page. Class days and times vary each term and can include five days a week during the morning/afternoon hours. Clinical assignments may be day (beginning at 6:30 AM), evening (beginning at 2:30 PM), or on a very limited basis night shift (beginning at 11 PM and ending at 7 AM). If the student follows the curriculum and the schedule provided by the department chairperson and director of clinical education, there should not be any extremely long days. If the student chooses different sections of non-RET prefix courses than those recommended by the faculty, they do so at their own convenience or inconvenience. There will be some clinicals that may require 24 hours per week participation. All schedules are provided about one month in advance so that the student may make arrangements for transportation, childcare, etc.

Recommended Prerequisite: SCC 1101 – First Year Experience (1 cr. hr.)

Courses that MUST be successfully completed (grade of C or better) to qualify for entry into RET technical courses with limited enrollment:

- Introduction to Chemistry: CHE 120 (on quarters) or CHE 1111 (on semesters)
- Mathematics: MAT 106 (on quarters) or MAT 1130 (on semesters) or any approved OTM MAT
- Medical Terminology: HIM 121 (on quarters) or HIM 1101 (on semesters)
- Human Biology: BIO 107 (on quarters) or BIO 1107 (on semesters)
- Introduction to Respiratory Care: RET 297 (on quarters) or RET 1100 on semesters)

Courses that MAY be successfully completed prior to entry into the technical courses with limited enrollment if the student chooses to do so include:

- ALH 1101 – Introduction to Healthcare Delivery
- ENG 1101 – English Composition
- PSY 1100 – General Psychology

NOTE: Please see an academic advisor for review of courses under the quarter system that may meet the aforementioned requirements.

The following grading scale is utilized for all Respiratory Care (RET) courses:

A = 92-100%
B = 83-91%
C = 75-82%
D = 67-74%
F = less than 67%

*ALL courses in the Respiratory Care curriculum must be completed with a "C" grade or better for successful completion of the program and subsequent graduation.

**The program reserves the right to make changes in the curriculum as needed to assure relevancy, and to meet the needs of the health care community and students. A current curriculum sheet is always available in the Respiratory Care chairperson’s office (room 14-318).
DESCRIPTION OF THE RESPIRATORY CARE PROFESSION

Respiratory therapists are members of a team of health care professionals working in a wide variety of clinical settings to evaluate, treat, and manage patients of all ages with respiratory illnesses and other cardiopulmonary disorders. As members of this team, respiratory therapists should exemplify the ethical and professional standards expected of all health care professionals.

Respiratory therapists provide patient care which includes clinical decision-making and patient education. The respiratory care scope of practice includes, but is not limited to the following basic competencies:

- acquiring and evaluating clinical data;
- assessing the cardiopulmonary status of patients;
- performing and assisting in the performance of prescribed diagnostic studies such as: obtaining blood samples, blood gas analysis, pulmonary function testing, and polysomnography;
- evaluating data to assess the appropriateness of prescribed respiratory care;
- establishing therapeutic goals for patients with cardiopulmonary disease;
- participating in the development and medication of respiratory care plans;
- case management of patients with cardiopulmonary and related disease;
- initiating prescribed respiratory care treatments, managing life support activities, evaluating and monitoring patient responses to such therapy and modifying the prescribed therapy to achieve the desired therapeutic objectives;
- initiating and conducting prescribed pulmonary rehabilitation;
- providing patient, family, and community education;
- promoting cardiopulmonary wellness, disease prevention, and disease management; and
- promoting evidence-based practice by using established clinical practice guidelines and by evaluating published research for its relevance to patient care.

ACCREDITATION STATUS

Sinclair Community College maintains full accreditation status from the Higher Education Learning Commission of the North Central Association. The Respiratory Care Program #200121 is accredited by the Commission on Accreditation for Respiratory Care (http://www.coarc.com/). The program received full accreditation in 2011 for a period of ten years and is scheduled to be reaccredited in 2020-21.

Commission on Accreditation for Respiratory Care
264 Precision Blvd
Telford, TN 37690
(817) 283-2835
Fax: (817) 354-8519
Web page: www.coarc.com/47.html

For further information regarding the Sinclair College respiratory care program outcomes data, please visit the CoARC website.

Upon successful completion of the program, the student will receive an Associate of Applied Science (A.A.S.) degree in the program of study in Respiratory Care.
PROGRAM GOAL AND OUTCOMES

Program Goal: To prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRTs).

Cognitive Outcome: Upon completion of the program, students will demonstrate the ability to comprehend, apply, and evaluate information relevant to the job description of an advanced respiratory care practitioner.

Psychomotor Outcome: Upon completion of the program, students will demonstrate the ability to proficiently perform all prescribed therapeutic modalities and diagnostic procedures relevant to the job description of advanced respiratory care practitioner.

Affective Outcome: Upon completion of the program student will demonstrate personal behaviors and attitudes consistent and appropriate to the advanced respiratory care professional. Students will be able to acknowledge the influence of diversity on patients, families and the health care team and be able to listen and effectively communicate both verbally and nonverbally.

Students must pass summative, pre-graduation assessments in order to graduate.

These outcomes are the basis for the Sinclair Guarantee for Job Competency for the Respiratory Care Program.

PROGRAMMATIC OUTCOMES DATA

The program submits data annually to the Commission on Accreditation for Respiratory Care (CoARC). To review and/or compare programmatic outcomes for attrition/retention, graduate placement, and performance post-graduation on the national board examinations of all respiratory care programs go to:

COST OF PROGRAM

- Tuition and fees are published in the current college catalog (https://catalog.sinclair.edu/).
- In addition to the "per credit hour" fee, there are lab fees assigned to courses with a RET lab and/or clinical components, which cover the cost of medical malpractice insurance and disposable supplies.
  - The course fees average $100-160 per course.
- Required textbooks will average $300-600 per term and may vary depending on the term and number of courses registered.
- Required review course prior to graduation will average $400-$450
- Required standardized examination preparation exam will average $110-120
- The student will also bear the cost of at least one criminal background check and compliance tracking (approximately $125 total), cost of uniforms (2 sets of scrubs), a stethoscope, ACLS and PALS cards (approximately $20) and a physical exam and applicable immunizations (including the Hepatitis B vaccine), and any fees associated with completion of healthcare provider cardiopulmonary resuscitation (CPR) prior to entering his/her first clinical rotation. The physical examination and immunizations can cost over $750 if the student does not have personal health insurance. A repeat tuberculosis skin test and annual flu vaccine are required during the second clinical year.
- Students are responsible for transportation costs to and from clinical facilities.
CRIMINAL BACKGROUND CHECKS, LICENSURE AND EMPLOYABILITY IN THE STATE OF OHIO

Any student who has been convicted of any criminal offense should be aware of Ohio Revised Code 9.78, which states as follows:

(A) As used in this section:

(1) "License" means an authorization evidenced by a license, certificate, registration, permit, card, or other authority that is issued or conferred by a licensing authority to an individual by which the individual has or claims the privilege to engage in a profession, occupation, or occupational activity over which the licensing authority has jurisdiction.

(2) "Licensing authority" means both of the following:

(a) A board, commission, or other entity that issues licenses under Title XLVII or any other provision of the Revised Code to practice an occupation or profession;

(b) A political subdivision that issues a license or that charges a fee for an individual to practice an occupation or profession in that political subdivision.

(B) An individual who has been convicted of any criminal offense may request, at any time, that a licensing authority determine whether the individual's criminal conviction disqualifies the individual from obtaining a license issued or conferred by the licensing authority. An individual making such a request shall include details of the individual's criminal conviction and any payment required by the licensing authority. A licensing authority may charge a fee of not more than twenty-five dollars for each request made under this section, to reimburse the costs it incurs in making the determination.

Not later than thirty days after receiving a request under this section, the licensing authority shall inform the individual whether, based on the criminal record information submitted, the individual is disqualified from receiving or holding the license about which the individual inquired. A licensing authority is not bound by a determination made under this section, if, on further investigation, the licensing authority determines that the individual's criminal convictions differ from the information presented in the determination request.

(C) A licensing authority shall make available to the public on the licensing authority's internet web site a list of all criminal offenses of which conviction of that offense shall disqualify an individual from obtaining a license issued or conferred by the licensing authority.

Students must participate in a state and federal background check for criminal convictions prior to attending clinical rotations, obtaining a license to practice and to become employed. Additional costs will be incurred by the student to cover these expenses. Depending on the outcome of the background check, it is possible that the student will be denied access to the clinical environment and therefore be unable to complete the program. No one will be permitted entry to the clinical setting if he/she has been convicted of a crime from the following list:
OFFENSES PROHIBITED FOR HEALTHCARE PROFESSIONS

SOURCE: Ohio Revised Code – 109.572 Criminal Records Check

Ohio Code Description

A second background check with associated fees is required for the licensure application in the State of Ohio. A license is required for anyone who desires to work in the field.

Hospitals and Home Healthcare agencies have the right to use sealed/expunged records in determining acceptance into clinical training or future employment.
Following successful completion of the curricula and clinical requirements of the first year of the program, students are eligible to obtain a limited permit/license to practice respiratory care in the State of Ohio. Information about the requirements, rules and laws, and application process can be obtained from: http://med.ohio.gov/RespiratoryCare.aspx.

State Medical Board of Ohio
Respiratory Care
30 East Broad Street
3rd Floor
Columbus, OH 43215-6108
614-466-3934

Licensure laws and other Ohio laws prohibit the issuance of a license and employability in certain areas of healthcare delivery if the applicant has been convicted or pleaded guilty to certain violations of the Ohio Revised Code, to include criminal and misdemeanor violations. Applicants for a license to practice respiratory care and/or employment in the State of Ohio are subject to fingerprinting and background checks. For specific details about which violations of the Ohio Revised Code prohibit the obtainment of a license to practice and subsequent employment, see the Health Sciences counselors or the chairperson of the program.

NATIONAL BOARD EXAMINATIONS AND CREDENTIALS

Upon successful completion of all program requirements, the graduate respiratory care practitioner is eligible for the following National Board for Respiratory Care (NBRC) examinations:

1. Therapist Multiple Choice examination for respiratory care practitioners - CRT credential awarded.
2. Clinical Simulation examination*.

*Upon successful completion of both the Therapist Multiple Choice and Clinical Simulation examinations, the graduate will receive registry status or the RRT credential.

3. Certification and Registry examinations for Pulmonary Function Technologist - CPFT and RPFT credentials are awarded.
4. Examination for a specialty in Neonatal/Pediatrics – NPS credential is awarded.
5. Adult Critical Care Specialist – ACCS credentials awarded
6. Sleep Disorders Testing and Therapeutic Intervention Respiratory Care Specialist – SDS credential awarded

7. Some states (including Ohio) have licensure and may require a separate examination if the graduate does not earn his certification credential within a specified timeframe following graduation.
