5 - Pandemic Disease- Blood Borne Pathogen Threat Annex

PURPOSE: – This annex describes the courses of action that the college will implement to address Pandemic Disease and Blood Borne Pathogen Threats.

Note: This annex is covered in complete detail in Sinclair College’s Public Health Emergency: Pandemic Influenza Preparedness Plan which is in Section 9 of this manual.

Procedures for handling normal Blood Borne exposure incidents are covered in Volume 1, Section 405 of Sinclair’s Safety Manual.

Events covered in this threat annex may require detailed procedures involving evacuation, accounting for all persons, communication and notification, medical care, security and recovery to follow when normal college operations are disrupted. The functional annexes that are contained in Sinclair College’s complete Emergency Management Plan.

1. For details of the evacuation procedure, see the Evacuation Functional Annex of this Manual.
2. In each of the hazards listed above, after there has been sufficient time to move to appropriate shelter areas, it will be necessary to account for persons displaced from their original locations. For details of this process, see the Accounting for All Persons Functional Annex of this Manual.
3. For details of communication about this event and for notifications procedures, see the Communications and Notification Functional Annex of this Manual.
4. Should college operations be disrupted in a significant manner as a result of these events, see the Continuity of Operations Functional Annex of this Manual.
5. Procedures for handling injuries to persons are addressed in Public Health/Medical Functional Annex of this manual.
6. For details of security procedures, see the Security Functional Annex of this Manual.
7. For details of the recovery procedures necessary for these events, see the Recovery Functional Annex of this Manual.
