A Message from Student and Community Engagement

Students,

As you are aware, the recent outbreak of COVID-19, as well as recommendations from the Ohio government, have encouraged our community to transition to remote learning as a way to try to reduce the spread of the virus through social distancing. In alignment with the decision to transition away from face-to-face classes, all in-person programming, including student group meetings, events, travel, career fairs, and other activities have been canceled beginning March 11, 2020 through the end of the spring 2020 semester. Please understand this is a rapidly evolving situation and these dates are subject to change as we learn more.

We understand that preparing for and beginning remote learning can be challenging. As you continue your education off campus, there are still opportunities to stay connected with Sinclair and other students, update your resume, practice your mock interview skills, civically engage, and gain a deeper understanding about what it means to be a good leader.

We encourage you to reach out to the Student and Community Engagement staff to learn more about these opportunities. We are currently offering multiple ways to meet with our staff, including email, video conferencing, and phone conversations, as a way to better support you from a far.

- Matt Massie, Ph.D.  
  Manager of Student and Community Engagement
